

PADI Digital Underwater Photographer Course

Bring home beautiful photos from your next dive holiday

With so much to see in terms of marine and reef life, we all want to capture our underwater adventures in photos that bring to life the colours and marine life we see.

That's where the Underwater Photographer course comes in. By taking this course, you'll learn how underwater photography differs from taking pictures on land, and you'll learn techniques to help you create the kind of photos you can proudly display.

Even if you don't own your own underwater camera yet, many dive resorts offer camera rentals, so why not be prepared to take the best photos possible on your holiday? And if you do have your own underwater camera, now is the time to try it out with the experts.

PADI Digital Underwater Photographer Course

Cost: \$199.99 or HALF PRICE with camera system purchase from Action Scuba*

Includes:

- Course manual
- Theory session
- Pool session
- Open Water Dive (required for Level 2)

*valid for purchases of camera systems valued at

Underwater camera is not provided. If you have access to the camera you will be regularly using, we strongly advise that you use this for the course in order to familiarize yourself with it's functionality and weight in the water. If you do not have a camera, one can be rented for the course from Action Scuba with advance notice (subject to availability).

You may opt to complete an open water session to complete the Level 2 Digital Underwater Photographer. Additional open water sessions are available under private instruction this summer or down south in order to fine tune your skills. Ask us for details. We can tailor a program to your needs.
